To whom it may concern

Wertheim, July 2019

Declaration of conformity to the REACH-Regulation (1907/2006/EG)

Lutz Pumpen GmbH is a downstream user as a manufacturer of articles in terms of REACH. Thus, our products are not subject to any registration, evaluation or authorization requirements. In addition, no substance is released from our products under normal and foreseeable conditions of use. Therefore, Lutz Pumpen GmbH is not subject to the registration obligation nor the obligation to provide safety data sheets. According to the current state of knowledge, no prohibited substances from the Candidate List of Substances of Concern (SVHC) are used respectively the maximum allowable limit values for the manufacture of our products are adhered.

<https://echa.europa.eu/candidate-list-table>

Obligation to inform according to article 33:

As a supplier of a product, we are subject to the obligation according to Article 33 of the REACH-Regulation to inform our customers if the product supplied contain one or more substances on the SVHC candidate list at a concentration of more than 0,1% by mass per partial product is/are included. If this is the case, we will unrequested inform our customers accordingly.

Obligation to inform on lead (Pb), CAS No. 7439-92-1

Lead was added to the SVHC candidate list in June 2018. Thus, all exceptions on lead (Pb) are now subject to information. Lead as an alloying element is present in low concentrations predominantly in steel (<0.35%), in aluminum (<0.4%), and in copper (<4%).

Steel, aluminum and copper materials used by us partly contain lead as an alloying element. Since lead is firmly bound as an alloying component, no hazards are posed by these products if they are used as intended. Lead can, however, be released in the event of improper use or disposal.

Lutz Pumpen GmbH points out that there is no legal obligation to issue confirmations as long as no listed substances are contained in the delivered products.

These statements are based on current state of our knowledge and experience. No warranty or liability can be accepted for factors beyond our knowledge and control.

Irrespective of this, we intensely pursue the implementation of REACH on the part of our suppliers in our own interest and to ensure a high level of product safety for our customers. We are in close communication with our suppliers of chemical substances and preparations (e.g. raw materials and supplies for the manufacture, treatment and processing of our products or use in other operational processes) and will include the pre-registration or later registration of the relevant substances in REACH in our supplier qualification.

Yours sincerely

Lutz Pumpen GmbH
